

National Pro-Life Alliance

2022 Congressional Candidate Survey

(Please see backgrounder on the back for explanation of questions and additional information.)

1. Will you support federal legislation giving parents the right to stop any abortion from being performed on their minor daughter, except to save the life of the mother?

I cannot answer this question as written. Remove the exception, then I will vote yes.

2. Will you support requiring a 48-hour "cooling off" period, and mandatory counseling on the risks and consequences of abortion for persons who believe they may want to have an abortion?

YES NO

3. Will you vote to require that abortion providers show the mother an ultrasound image of her child before any abortion takes place?

YES NO

4. Will you support legislation to outlaw so-called "sex selection" abortions?

YES NO

5. Would you vote to prohibit the U.S. government from granting any public funds to groups that perform abortions?

YES NO

6. Will you vote to bar webcam or "telemed" abortions as well as the distribution of any drugs like RU-486 that are prescribed to cause an abortion?

YES NO

7. Will you support nominees to the United States Supreme Court and the lower federal courts who will uphold the constitutional right to life of every human person, born and unborn?

YES NO

8. Will you vote against any bill that would codify *Roe v. Wade* or expand it?

YES NO

9. Would you support and cosponsor a Life at Conception Act defining that life begins at the moment of conception thereby resolving for all time, as stated by the Supreme Court in *Roe v. Wade*, "the difficult question of when life begins?"

YES NO

10. Will you support an amendment to the U.S. Constitution banning abortion except to save the life of the mother?

I cannot answer this question as written. Remove the exception, then I will vote yes.

Questions 1 & 10 - Yes if there are no exceptions. If I said yes and the exceptions remain, then I am stating I am okay with some abortions. I am not. The percent of women who fall into this category historically is less than 1% according to abortionfacts.com; lifenews.com states 30,000 doctors say late-term abortion is never medically necessary to save the life of the mother.

Signed: _____

Date: _____

Ms. Jo Rae Perkins State: OR Office: US Senate Party: R

2022 Congressional Candidate Survey

Backgrounder & Explanation of Questions

1. Thousands of underage girls, faced with an unplanned pregnancy, currently fall prey to the propaganda efforts of the abortion industry and lose their baby, often without the benefit of discussion and counseling, or even the prior knowledge of the girls' parents.
2. Often, the decision to obtain an abortion is made hastily and under duress. Under current federal law, abortion clinics are not even required to inform a woman about the physical and psychological risks involved in destroying her unborn child.
3. Studies show that up to 78% of abortion-minded mothers who see a sonogram of their baby ultimately reject abortion and choose life. That's why, although abortionists use sonograms themselves to perform abortions, they typically refuse to show the image to the mother unless forced to.
4. Female victims of abortion outnumber baby boys by as high as a three-to-one margin -- a statistic ignored by many self-styled "feminist" pro-abortion advocates.
5. Every fiscal year, countless efforts are made by pro-abortion groups and their political allies to insert abortion-funding language into nearly every federal department's budget.
6. The Clinton Administration rushed approval of RU-486 by skipping normal testing and approval procedures. It has already been used to kill millions of unborn children. Now the abortion lobby is seeking to expand the lethal drug's use by mailing it to pregnant mothers to self-administer after a brief virtual or webcam meeting. In this way, abortions can be done quickly and secretly without any other counsel.
7. The radical pro-abortion lobby realizes that the American people reject the extremist notion of abortion-on-demand and that controlling the courts is the only way they can successfully advance their agenda.
8. In 2021, the House of Representatives passed the so-called "Women's Health Protection Act." It is claimed that it would "merely" codify *Roe v. Wade*. That alone would enshrine legal protection of abortion-on-demand into federal law during all nine months of pregnancy. Yet in reality, it is a massive expansion of *Roe*, erasing all federal and state laws that put even minor limits on the so-called "right" to an abortion including parental intervention laws, ultrasound laws, limits on tax funding of abortion and abortions on viable babies.
9. When it handed down the infamous *Roe v. Wade* decision, the Supreme Court admitted that if Congress established when life begins, the so-called "right" to an abortion would "collapse," as unborn children would then be protected as "persons" under the Fourteenth Amendment to the U.S. Constitution. Now, the burden is on Congress to establish that life begins at conception.
10. A Human Life Amendment to the U.S. Constitution would permanently protect all unborn children from dying at the hands of abortionists.
